RO

AUG 3 1959

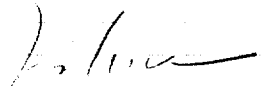

Dear Joe--

Does Bristol have a product in this field--
I mean radiocontrast agents? (Or maybe later
density-fractionation solutes). *

By coincidence, the latest Ann NYAS is on this
subject.

Thanks for the reprints.

Harry Rubin told me of his visit. He's an
able fellow.

(a tetraiodo-benzoyl or-phthaloyl penicillin
might not be altogether preposterous: take ad-
vantage of the low toxicity and rapid excretion
of the penicillins)

Have any penicillins been made where R- is
an amino acid?

cc: letter to Testagen.
